Exposure Guidelines

Exposure limit: Guideline ACGIH: Not established.
Guideline OSHA: Not established.

Appropriate engineering controls

Engineering Controls: No special protective equipment required under normal conditions of use. Use appropriate engineering control such as process enclosures, local exhaust ventilation, or other engineering controls to control airborne levels below recommended exposure limits. Good general ventilation should be sufficient to control airborne levels. Where such systems are not effective wear suitable personal protective equipment, which performs satisfactorily and meets OSHA or other recognized standards. Consult with local procedures for selection, training, inspection and maintenance of the personal protective equipment.

Individual protection measures

Eye Protection: No special protective equipment required under normal conditions of use. If splashes are likely to occur, wear chemical splash goggles.

Face Protection: No special protective equipment required under normal conditions of use. If splashes are likely to occur, wear chemical splash goggles.

Skin Protection: No special protective equipment required under normal conditions of use.

Respiratory Protection: No special protective equipment required under normal conditions of use. No personal respiratory protective equipment is normally required. The need for respiratory protection will vary according to the airborne concentrations and environmental conditions (such as in manufacturing).

Hygiene Practices: Wash thoroughly after handling. Avoid contact with eyes.
