

Premium Powder + *Skin Gel* Wipes

A combination for the management of excoriated skin

- Hollister Premium Powder protects raw and weeping skin by creating a sticky gel when in contact with body fluid
- Premium Powder may be dispensed prior to application onto a suitable medium from which the powder may be tapped onto excoriated skin in order to meet Infection Control requirements
- Apply sparingly to absorb moisture or exudate from skin prior to applying a secondary dressing
- Hollister Skin Gel Wipes protect skin by forming a thin semi permeable polymer coating over the skin
- When applied over Premium Powder, the film seals the site and allows the powder to remain in situ
- In combination with Premium Powder, the alcohol in the wipe is unlikely to cause a stinging sensation as the powder “seals” the broken skin
