

Wound Care Products

Restore Plus and Restore Extra Thin

The edge in wound healing

Restore Plus and Restore Extra Thin Hydrocolloid Wound Care Dressings create a moist wound healing environment. Extended wear time, up to 7 days, results in fewer dressing changes, less skin irritation and reduced care time, all of which means more value for money.

The dressings are easy to apply and conform to the body contours. Their flexibility is ideal for difficult-to-manage wound sites.

Restore Plus – A Hydrocolloid Wound Care Dressing with Outstanding Performance

In a clinical study of 206 patients, clinicians highly rated the Restore Plus Wound Care Dressings in the following areas of performance:

- Absorption of exudate.
- Autolytic debridement.
- Conformability.
- Adhesion
- Minimal residue remaining on the periwound skin.
- Application.
- Patient comfort.

In this same study, Restore Plus was also highly rated in these areas:

- Ease of removal.
- Minimal residue left in wound bed.
- Value for money, wear time up to 7 days.

Easy to Use

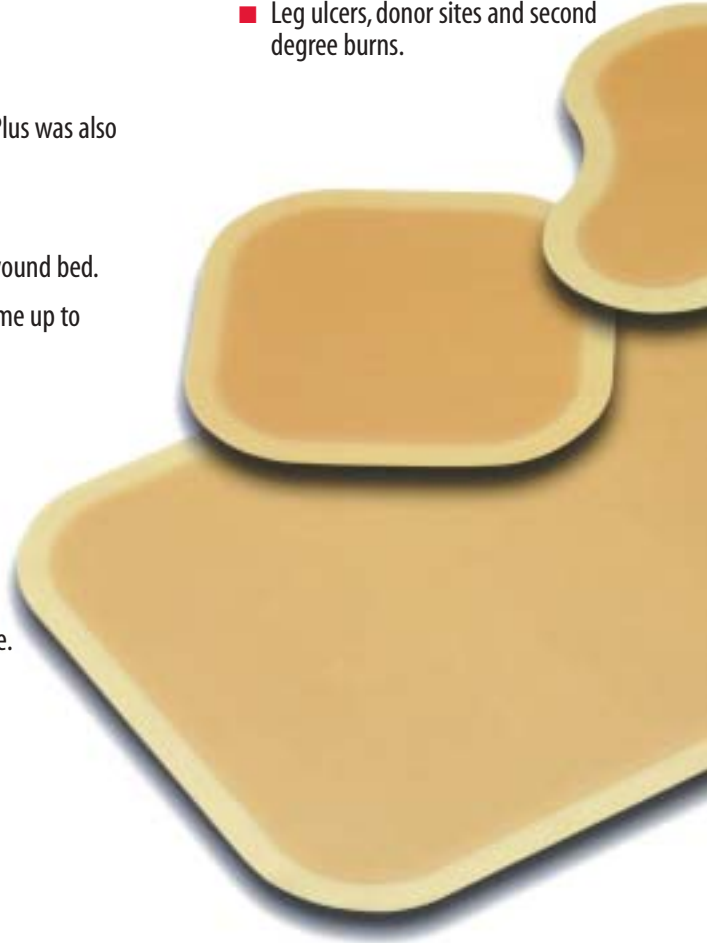

- Easy to cut and shape because of its ultra-thin ElastaFlex backing film.
- Easy to apply and remove.

Patient Comfort

- Soft and flexible, conforms to body contours and wound sites that are difficult to manage.
- Superior fluid handling capacity prevents periwound skin maceration.
- Isolates the wound from contamination; allows normal maintenance of hygiene.

Clinical Indications

- Pressure sores (Stages I to IV).
- Dermal ulcers (partial and full-thickness wounds).
- Leg ulcers, donor sites and second degree burns.

Excellent total fluid handling capacity

- Prevents maceration of periwound skin.

Highly conformable

- Ideal for difficult-to-manage wound sites.

Improved adhesion

- Reduces care-giver time and dressing costs.

Facilitates moist wound healing

- Wounds heal faster in an ideal environment.

Indicated for partial and full-thickness wounds

- Meets a variety of wound care needs.

Excellent total fluid handling capacity

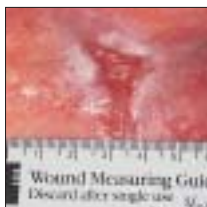

Highly conformable

Improved adhesion

Facilitates moist wound healing

Indicated for partial and full-thickness wounds

Transparency permits visual Assessment of wound site without dressing removal

Restore Extra Thin – A Hydrocolloid Wound Care Dressing That Protects and Manages Superficial Wounds

A thin, flexible, sterile hydrocolloid wound dressing which provides value for money. It has demonstrated wear time of up to 7 days. The dressing features:

- Conformability.
- Ease of application.
- Excellent adhesion.

Easy to Use

- Easy to cut and customise to wound shape; dressings can be overlapped.
- Easy to apply and remove.
- Ideal for moulding around bony prominences.

Patient Comfort

- Transparency permits visual assessment of wound site without dressing removal.
- Occlusive and waterproof; allows normal daily activities while keeping the wound free of contamination.
- Lightweight dressing stretches; patient has added freedom of movement.

Clinical Indications

- Protects skin from friction injury
- Manages superficial wounds with minimal or no exudate.
- Ideally suited for bony prominences such as elbows, knees, ankles and hands.
