

Competitive Product Conversions

Key Considerations

- The following Conversion Charts are for reference only. When attempting to convert from a ConvaTec product to a Hollister product, it is important to realize that such a transition often cannot be made with a one-to-one match. Thus, more than one option should be considered and all product features must be reviewed, example: suggested product may have a different skin barrier, or some pre-sized conversions may result in a cut-to-fit product.
- Due to space limitations only the basic features of each product are shown. For a full product description, including HCPCS and quantity, please refer to the current Hollister Products Catalog.
- The following product brands are the focus products from Hollister and feature our most advanced technology:
 - **New Image** Two-Piece Pouching System
 - **Premier** One-Piece Pouching System
 - **Adapt** Accessories
- With Two-Piece product conversions, first select an appropriate skin barrier and then choose an appropriate pouch.
 - Flange sizes may change in some instances
 - Flange sizes must match with the barrier and pouch selected, (e.g., green to green)
 - New Image pouches must be used with New Image skin barriers. They cannot be used with the **CenterPointLock** system
- Regarding drainable pouches, the focus is on drainable pouches that feature the **Lock 'n Roll** Closure. Drainable pouches with a traditional pouch clamp may, however, be more appropriate for certain people, depending on their individual product needs.

ConvaTec — SUR-FIT Natura to New Image

Two-Piece Barriers: SUR-FIT Natura (now 10/box) to New Image

SUR-FIT Natura Moldable Convex Barrier

Duraheasive Extended Wear, with White Tape

Stock No	Flange Size	Barrier Opening
404592	1-3/4" (44mm)	1/2"-7/8"
