HCPCS Codes Disclaimer

The reimbursement information provided herein is intended to provide general information concerning coding of Hollister products only. Hollister does not guarantee coverage or payment for any products. The ultimate responsibility for proper coding, satisfying reimbursement requirements, and obtaining reimbursement remains with the provider. Coding and coverage policies and guidelines are complex, can vary from one carrier or region to another, and are updated frequently. Providers should check with their local carriers or intermediaries often and should consult with counsel, a reimbursement specialist, and/or the DMECS website for any coding, coverage, reimbursement, or billing questions.

HCPCS codes shown in this Product Catalog are current as of 12-23-10.

Explanation of Third Party Code Reimbursement System (National Health Related Items Code)

To facilitate reimbursement of Hollister products, some Third Party Payment Programs require the use of an eleven-digit reimbursement number. Every Hollister manufactured product can be identified by an eleven-digit number. In general, the first five numbers identify the manufacturer's labeler code, and the last six numbers represent the product stock number. The labeler code for Hollister Incorporated is 08380. The labeler code for Hollister Wound Care LLC is 08567, and the labeler code for the Apogee product line is 08598. In order to utilize this coding system, follow these examples.

To code a four-digit stock number:

The Third Party Reimbursement Number for the Apogee 12 Fr Intermittent Catheter, Stock Number 1048 listed in the catalog on page 92, is: 08598-0010-48

08598 identifies Apogee. 0010-48 identifies the product Stock Number.

To code a five-digit stock number:

The Third Party Reimbursement Number for the New Image Drainable Pouch, Stock Number 18113 listed in the catalog on page 30, is: 08380-0181-13

08380 identifies Hollister Incorporated. 0181-13 identifies the product Stock Number.

To code a six-digit stock number:

The Third Party Reimbursement Number for the Restore Contact Layer Dressing with TRIACT Technology, Stock Number 509338 listed in the catalog on page 127, is: 08567-5093-38

08567 identifies Hollister Wound Care LLC. 5093-38 identifies the product Stock Number.

Additionally, three products in the Hollister Wound Care line require an NDC number due to their Dimethicone-based nature. The labeler code for their OTC drug products is 42828. The three NDC numbers are listed below.

NDC	Stock No.	Description
42828-9977-02	529977	Restore Cleanser & Moisturizer, 7.5 oz
42828-9978-03	529978	Restore Cleanser & Moisturizer, 11.5 oz
42828-9979-01	529979	Restore Dimethicreme Skin Protectant, 4 oz

Latex Statement

The specifications for the Hollister Continence Care products listed below include natural rubber latex as a component; our suppliers add natural rubber latex as part of the production process.

If a Hollister product(s) found in this catalog is not listed below, the specification for that product(s) and packaging does not include natural rubber latex as a component, and our component suppliers do not add natural rubber as part of their production process.

How to Use The Hollister Products Catalog

Hollister has created this simplified Product Catalog to help our customers find what they need in a quick and efficient manner.

If you...

know the stock number (or stock series number)

Go to the numeric index at the back of the catalog on pages 158-159 to find the page number where it appears.

If you...

know the product brand or series name

Go to the Table of Contents on pages 9-10, 86, 104, 112 and 118 to find the page number where it appears or reference the Product Name Index on pages 160-162.

If you...

know the HCPCS code

Go to the HCPCS Code Index at the back of the catalog on page 163.

† Product Discontinued as of July 2007

‡ Product Discontinued as of January 2009

* Product Discontinued as of September 2009

§ As of February 2009, this product has been redesigned to exclude natural rubber latex either as a component or from the production process. The packaging/insert of the new non-latex version of the product will not contain a latex statement. Please verify the latex status of the individual product prior to use by reviewing the packaging and product insert for a latex statement. A latex statement indicates the product is from the previous latex version.

Anchor Fast Oral Endotracheal Tube Fastener

Advanced Design, More Convenient

- An easy-to-use alternative to tape for securing oral endotracheal tubes
- Only one person required for tube repositioning
- Allows easy access for suctioning and oral care
