Choose Blue.

Hydrofera Blue Classic dressings

The choice for:

- Broad-spectrum antibacterial protection
- Rapid wicking and exudate retention
- Autolytic debridement
- Edge effect
Choose Hydrofera Blue Classic Dressings to Address Wound Bed Preparation

Successful wound management requires management of bioburden, maintaining moisture balance and removal of devitalized tissue. Hydrofera Blue Classic dressings can help all of these in a single dressing.

The Wound Bed Preparation Paradigm

- Person with a chronic wound
  - Treat the cause
  - Local wound care
  - Patient-centered concerns
    - Debridement
    - Infection & inflammation
    - Moisture balance
    - Edge effect

Highly absorptive, PVA micro-pore foam structure
- Wicks and retains fluid
- Soft and flexible when moistened

Broad-spectrum antibacterial protection
- Provided by gentian violet and methylene blue

Hydrate before use
Choose Without Compromise

✅ Choose Blue: Bioburden Management

- Broad-spectrum antibacterial activity provided by two well-known organic pigments, methylene blue and gentian violet
- Non-cytotoxic
- Less expensive than many silver foam dressings

✅ Choose Blue: Autolytic Debridement

- Multiple authors have observed autolytic debridement with use of Hydrofera Blue Classic dressings.
- In a porcine eschar study, a statistically significant reduction in eschar was seen when Hydrofera Blue Classic dressing was used. These results may not be representative of effects in humans.

Hydrofera Blue Classic dressings are compatible with enzymatic debriders

Example of devitalized tissue removed at dressing change

✅ Choose Blue: Moisture Management

Hydrofera Blue Classic dressings’ micro-pore structure is specifically designed for wound care. It maintains similar absorbency as compared to other highly absorptive dressings.

✅ Choose Blue: Edge Effect

Multiple authors have noted resolution of epibole or flattening of wound edges with use of Hydrofera Blue Classic dressings.

Graph reflects the percentage of epibole edges that flattened within the first 2 weeks of use without compression

- 80% Epibole edges flattened with Hydrofera Blue Classic dressing
- 25% Epibole edges flattened with Acticoat (silver)
**Broad-spectrum antibacterial protection against the microorganisms commonly found in wounds.**

**Bacteria**
- Methicillin-resistant Staphylococcus aureus (MRSA)
- Staphylococcus aureus
- Staphylococcus epidermidis (coagulase negative)
- Pseudomonas aeruginosa
- Pseudomonas fluorescens
- Enterococci (VRE)
