Wound healing requires a holistic approach that addresses wound bed preparation as well as treating the underlying cause. Successful local wound management requires:

- Removal of devitalized tissue
- Management of bioburden
- Maintenance of moisture balance

The Wound Bed Preparation Paradigm

Hydrofera Blue is your choice to overcome key barriers to healing. Hydrofera Blue dressings can help address all three components. Helping you create an environment where wounds can heal.

Indications for use: Pressure ulcers, Diabetic ulcers, Venous stasis ulcers, Arterial ulcers, Superficial burns, Donor sites, Skin grafts, Post surgical incisions, Traumatic wounds, Skin tears, Abrasions, Lacerations
Hydrofera Blue…
Safe, Natural Debridement

Diseased tissue can allow wound healing and may increase the risk of infection.

- Autolytic debridement is known to be a safe and selective form of debriding wounds.1
- Multiple authors have described autolytic debridement with use of Hydrofera Blue CLASSIC dressings.2
- In a porcine eschar study, a statistically significant reduction in eschar was seen with use of Hydrofera Blue CLASSIC dressing.1

Safe, Effective, Bioburden Management

Managing bioburden helps the body's immune system to restore natural bacterial balance. Well-known antibacterials - methylene blue and gentian violet - work to help bind bacteria and harmful endotoxins to the dressings.

- Provides broad-spectrum antibacterial activity and acts as a protective cover for wounds at risk of infection.
- Does not inhibit growth factor activity.6
- Is non-cytotoxic.
- Provides broad-spectrum antibacterial activity and acts as protective cover for wounds at risk of infection.

Optimal Moisture Balance

Inadequate moisture balance may be detrimental to wound healing. Hydrofera Blue dressing's micro-pore structure helps maintain moisture balance at the wound surface.

- Rapidly wicks moisture away from the wound.
- Helps maintain moisture balance at the wound surface.
- Is highly absorptive, well suited for moderate to heavy exuding wounds.
