Calcium Alginate Dressings For Wound Care

Restore Calcium Alginate Dressings

High Absorbency without Sacrificing Strength

High wet strength allows intact, one-piece removal

The highly absorptive composition of the dressing – made from calcium sodium alginate – creates a conformable, protective gel when in contact with exudate.

Benefits

- **Highly absorbent**
Uniformly absorbs exudates and protects the peri-wound skin
- **Forms and helps maintain a moist wound interface**
Creates a conformable, protective gel when in contact with exudate
- **Superior wet strength**
Intact, one-piece removal facilitates ease of removal
- **Less residue than other dressings**
Reduces need for repeated irrigation that might damage new tissue
- **Protects the wound**
Aids autolytic debridement, facilitating wound healing
- **Hemostatic Properties**
As this product contains alginate, it may assist in supporting the control of minor bleeding in superficial wounds

INDICATIONS FOR USE

- Restore Calcium Alginate Dressings can be used on a wide variety of moderate to heavily exuding partial to full-thickness wounds
- Can be used under compression bandages
- Also indicated for: Post-operative surgical wounds
1st and 2nd degree burns

Restore Calcium Alginate Dressings, Silver

All the Benefits of our Calcium Alginate Dressings *Plus* the Benefits of Silver

Restore Calcium Alginate Dressings, Silver provide all the benefits of Restore Calcium Alginate Dressings *plus* the proven antimicrobial benefits of silver.

Benefits

- **Sustained Silver Release**
Silver ions are released in the presence of wound exudate
- **Antimicrobial Effect Protects Dressing**
Effective against a broad spectrum of micro-organisms over a period of up to 14 days, based on in-vitro testing (which is beyond indicated wear time) including: MRSA, VRE, Fungi
- **Odor reduction**
Results from the antibacterial effect in the dressing
- **Effective barrier** to bacterial penetration

INDICATIONS FOR USE

- Restore Calcium Alginate Dressings, Silver can be used on a wide variety of moderate to heavily exuding partial to full-thickness wounds
- Can be used under compression bandages
- Also indicated for: Post-operative surgical wounds
1st and 2nd degree burns
Wounds that are critically colonized
