20+

Key Products for Continence Care

Our Products

Understanding Ostomy Care

An ostomy results from a surgical procedure, caused by certain cancers, diverticulitis, incontinence, Crohn's, Ulcerative Colitis and other conditions.¹

1,000,000

people in the U.S. live with an ostomy²

Up to **76%**

of people with an ostomy experience a peristomal skin complication, impacting their quality of life³

Hollister Solutions

Hollister skin barrier products are developed to maintain healthy skin and support the quality of life of a person with an ostomy.

Hollister's CeraPlus™ Portfolio* is the only advanced line of ostomy products in the U.S. infused with ceramide that protects skin from day one.

↓ 15% fewer peristomal skin complications⁴

↓ 14% lower ostomy-related healthcare costs⁴

Understanding Continence Care

Incontinence affects all types of people, and can be caused by various diseases, spinal cord injuries or neurological conditions. Proper continence care is essential in maintaining independence and leading a rewarding and dignified life.

~400,000,000 catheters are used annually in the U.S.⁵

Hollister Solutions

Hollister's VaPro™ No Touch intermittent catheter was proven to provide superior protection in reducing the transmission of pathogens to effectively zero in a recent study.⁶

VaPro™ intermittent catheters, with a combination of a protective tip and sleeve, outperformed other leading brands in preventing microbial contamination, a leading risk factor in Urinary Tract Infections.⁶

50% of real-world participants reported less frequent UTIs after switching to VaPro™ catheters.⁷

Designed for women, Infyna Chic™ intermittent catheters are easy to open with one hand and don't leak when reclosed after use. Modern, feminine, discreet.
