

Maintaining the right environment

for the shape of the landscape

The **CeraPlus** Soft Convex
One-Piece Urostomy Pouching System

A great fit. A formulation designed to support healthy skin.

Welcome to the best of both for your Urostomy patients.

You asked. We've answered. The science of a ceramide-infused skin barrier is now available with the gentle support of soft convexity for Urostomy.

The Advantage of Ceramide...

Although every body is different, keeping the skin around the stoma healthy is a priority. The condition of the skin affects how well the skin barrier can adhere, as well as the comfort and well-being of a person living with a stoma.

That's where ceramide comes in.

A natural component of human skin, ceramide helps prevent water loss that can lead to skin damage and dryness. A waxy lipid, ceramide helps link the cells of the outer layer of skin together to form a waterproof, protective barrier. The CeraPlus skin barrier is infused with ceramide and designed to:

- Help protect the skin's natural moisture barrier
- Help decrease transepidermal water loss (TEWL) from damaged or eroded skin
- Help maintain healthy peristomal skin from the start

...Meets the Flexible Security of Soft Convex

A good seal around the stoma is essential for helping to prevent leakage. For many people, however, the presence of skin folds, recessed stomas, or extra weight can make it challenging to get the right fit.

Soft convexity is designed to help provide gentle peristomal pressure for an individualized fit. It helps conform to accommodate uneven skin surfaces, and is a more flexible alternative to firm convexity.

The CeraPlus Soft Convex One-Piece Urostomy Pouching System

Soft convex fit

Flexible design helps provide gentle pressure around the stoma for a better fit

Adhesive border barrier

Additional perimeter of thin adhesive provides extra peace of mind

Belt Tabs

A belt may be added for additional support and sense of security

Ceramide-infused barrier

CeraPlus skin barrier is infused with ceramide to help protect the skin's natural moisture barrier

Multi-chamber design

Multiple built-in chambers are designed to facilitate a balanced collection of urine, resulting in a discreet pouch profile

Soft, flow-control tap

Made with soft material and a streamlined shape, the tap helps provide comfort against the body and makes it easy to identify when the valve is closed

Cut-to-Fit, Ultra Clear

HCPCS: A4430 | Box of 5
